

MAILBOX SUPPORT POLICY

Updated: April 26, 2006

PURPOSE: To assure that mailbox supports are installed properly along County Highways and County State Aid Highways.

POLICY: The County will provide the initial mailbox support installation at no cost to the resident provided the support is along a County Highway or a County State Aid Highway.

The County will perform the required maintenance activities on existing mailbox supports that are knocked down along County Highways and County State Aid Highways at no charge to the property owner – except insurance claims will be made through the proper channels.

The County will continue to charge the established rates for the sale of mailbox supports to individuals along City Streets, Township Roads and State Highways.
